Hindustan Zinc Q2 Profit Falls 15%

Our Bureau

Hindustan Zinc on Wednesday reported a 15% year-on-year drop in its net profit for the July-September quarter to ₹1,902 crore after depreciation charges. The company's net profit fell 30% from ₹2,720 crore in the first half of the current fiscal year, mainly due to a decline in investment income on account of a smaller corpus despite higher returns on market gains. On a consolidated basis, its revenue rose to ₹3,820 crore during the quarter, owing to higher volume and higher prices. However, compared to the same quarter a year ago, the revenue was 18% lower in Q2 and 19% lower in the first half of the fiscal year on account of lower volumes, partly offset by higher prices of zinc and the rupee depreciation.

The cost of zinc production before royalty during the quarter was ₹54,186 per tonne, down 12% from the previous three-month period but up 8% from that a year ago, the company said in a statement.

The company's EBITDA stood at ₹2,077 crore, up 84% QoQ, but 6% less than in the year-ago period. In the first half of this fiscal, EBITDA was 18% lower than a year ago, in line with production, which was balanced by higher silver and zinc prices along with the rupee depreciation.

"The price rally in zinc continued this quarter, with prices climbing 18% from the previous quarter, consistent with its strong fundamentals. Silver prices, too, have rallied coupled with increasing silver volumes," said Hindustan Zinc chairman Agnivesh Agarwal.

for industry," said Pratik, indirect tax, PwC India. He added that the government's move to impose taxes and complicate the structure. One hopes that the government will reconsider the decision. Increasing the rate of tax might be a better solution than having a non-creditable input credit for mineral products." The proposal that's been made is to tax clean energy and tobacco at a higher rate, raising the tax rate on these products.

STRATION

In administration, there is a concern that duplication has to be avoided. The underlying principle, which is accepted, is that one assessment should be assessed by one authority, he said. States such as West Bengal need new data to support the argument that states should be given control of even those services with a turnover of more than ₹100 crore per year. The government had proposed a cross-sector model that will allow states to restrict their inter-state trade and integrated GST and integrated
